# INTRODUCTION

AS the Bulletins contain much material of great interest to Planters and Horticulturalists in general, I have endeavoured to form as complete an index as possible by including each article under its special heading. This has been a matter of extreme difficulty as many articles had no title so that in many cases one article may be found under one of two or three headings.

Many of our readers may be interested in some special subject and may not want to purchase a complete volume to obtain the necessary literature, so that I have given the Volume, the Month and the page in nearly every case. Should they desire some particular article, it will now only be necessary to write to the Botanic Gardens giving Volume and Month *(by the way, enclosing the cost of same).*

As the Bulletin has been edited largely for the help of Planters in general, I have also endeavoured to keep all the articles on Para Rubber by themselves. This method should greatly facilitate the reference to articles required by Planters which have appeared in the Bulletins.

I trust this has not been a labour in vain and that it will supply a long felt want.

JAS. W. ANDERSON.
Assistant Curator.

WE desire to call the attention of planters and others to the fact that we can furnish them with all kinds of estate printing. The quality of work we produce is not to be surpassed anywhere in the Straits. We give prompt delivery and pay special attention to those far removed from a reliable printing centre. Our printing department, which is kept always up-to-date, is specially laid out for carrying on all branches of printing and bookbinding whilst the adoption of the most modern methods enables as to quote at very reasonable charges. Write us at once for quotations.
